Brand overview

A familiar dashboard, created from the recognised brand-tracker structure.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Awareness	Consideration	Shortlist	First choice
87.6%	39.0%	19.7%	7.5%
+2.7 pp vs June	+5.1 pp vs June	+2.8 pp vs June	+0.9 pp vs June

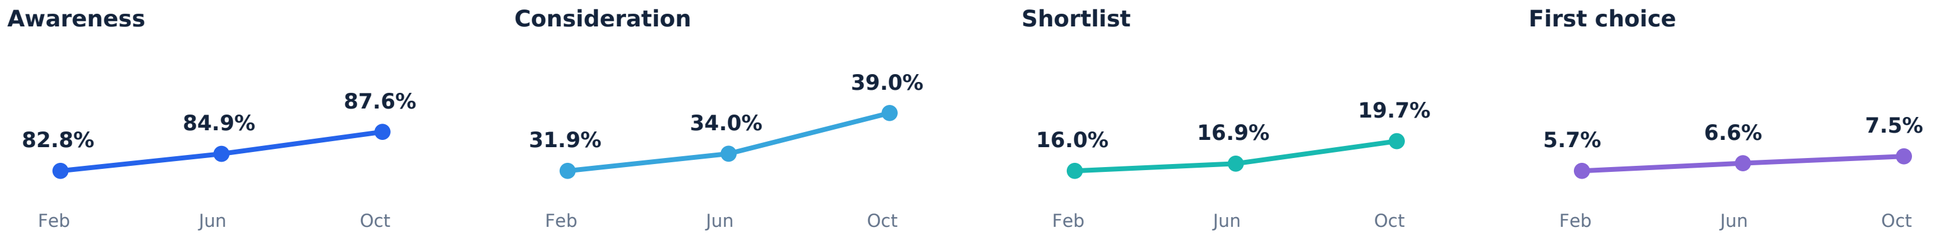

Compare the brand funnel

All eligible respondents, n=1,000 per brand. Selected comparators, not a ranking.

	BMW	Mercedes-Benz	Volkswagen	Toyota	Haval
Awareness	87.6	82.9	90.9	95.9	71.1
Consideration	39.0	22.2	52.3	64.3	23.5
Shortlist	19.7	10.0	27.9	30.7	12.1
First choice	7.5	3.1	11.7	13.3	4.6

BMW across three waves

Independent samples: n=1,000 each wave. Changes use unrounded values; no significance claims.

Design preview

Static mockups for automatic dashboards. No live integration.

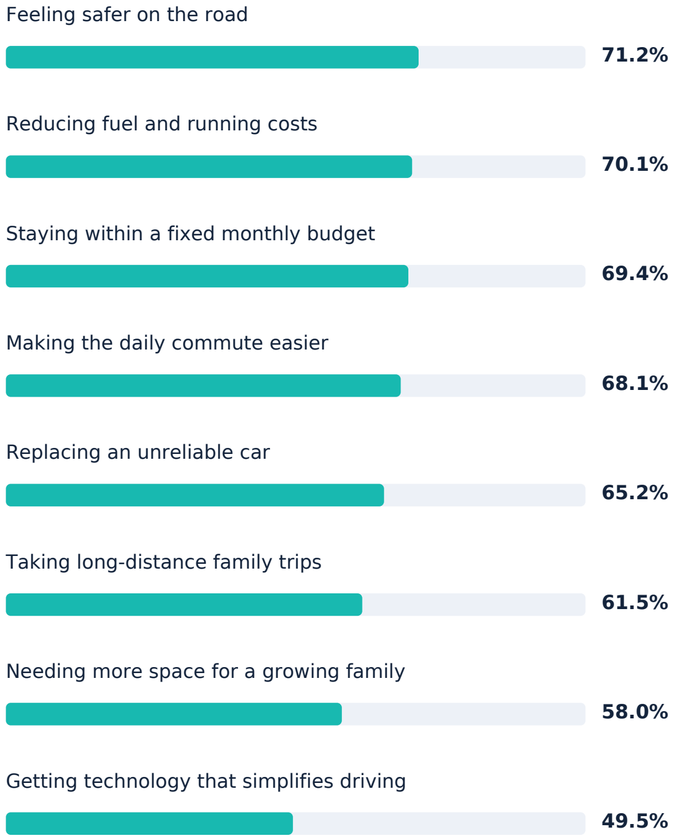

Moments & needs

Understand category needs, then see which brands come to mind for each.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Category moments

Personal relevance, multiple response; n=1,000.

Moment x brand recall

Cue-specific recall, not personal relevance. All eligible, n=1,000.

	BMW	Mercedes Benz	Volkswagen	Toyota	Haval
Feeling safer on the road	12.9%	10.2%	22.4%	28.9%	6.8%
Reducing fuel and running costs	6.9%	10.4%	20.2%	27.2%	6.6%
Staying within a fixed monthly budget	6.1%	8.6%	20.8%	27.5%	8.2%
Making the daily commute easier	12.7%	9.2%	21.6%	27.1%	6.4%
Replacing an unreliable car	11.9%	11.8%	21.4%	25.8%	8.1%
Taking long-distance family trips	11.3%	10.7%	21.2%	28.1%	7.2%

Six moments selected by highest category relevance. Darker blue = greater cue-specific brand recall; no statistical comparison implied.

Design preview

Static mockups for automatic dashboards. No live integration.

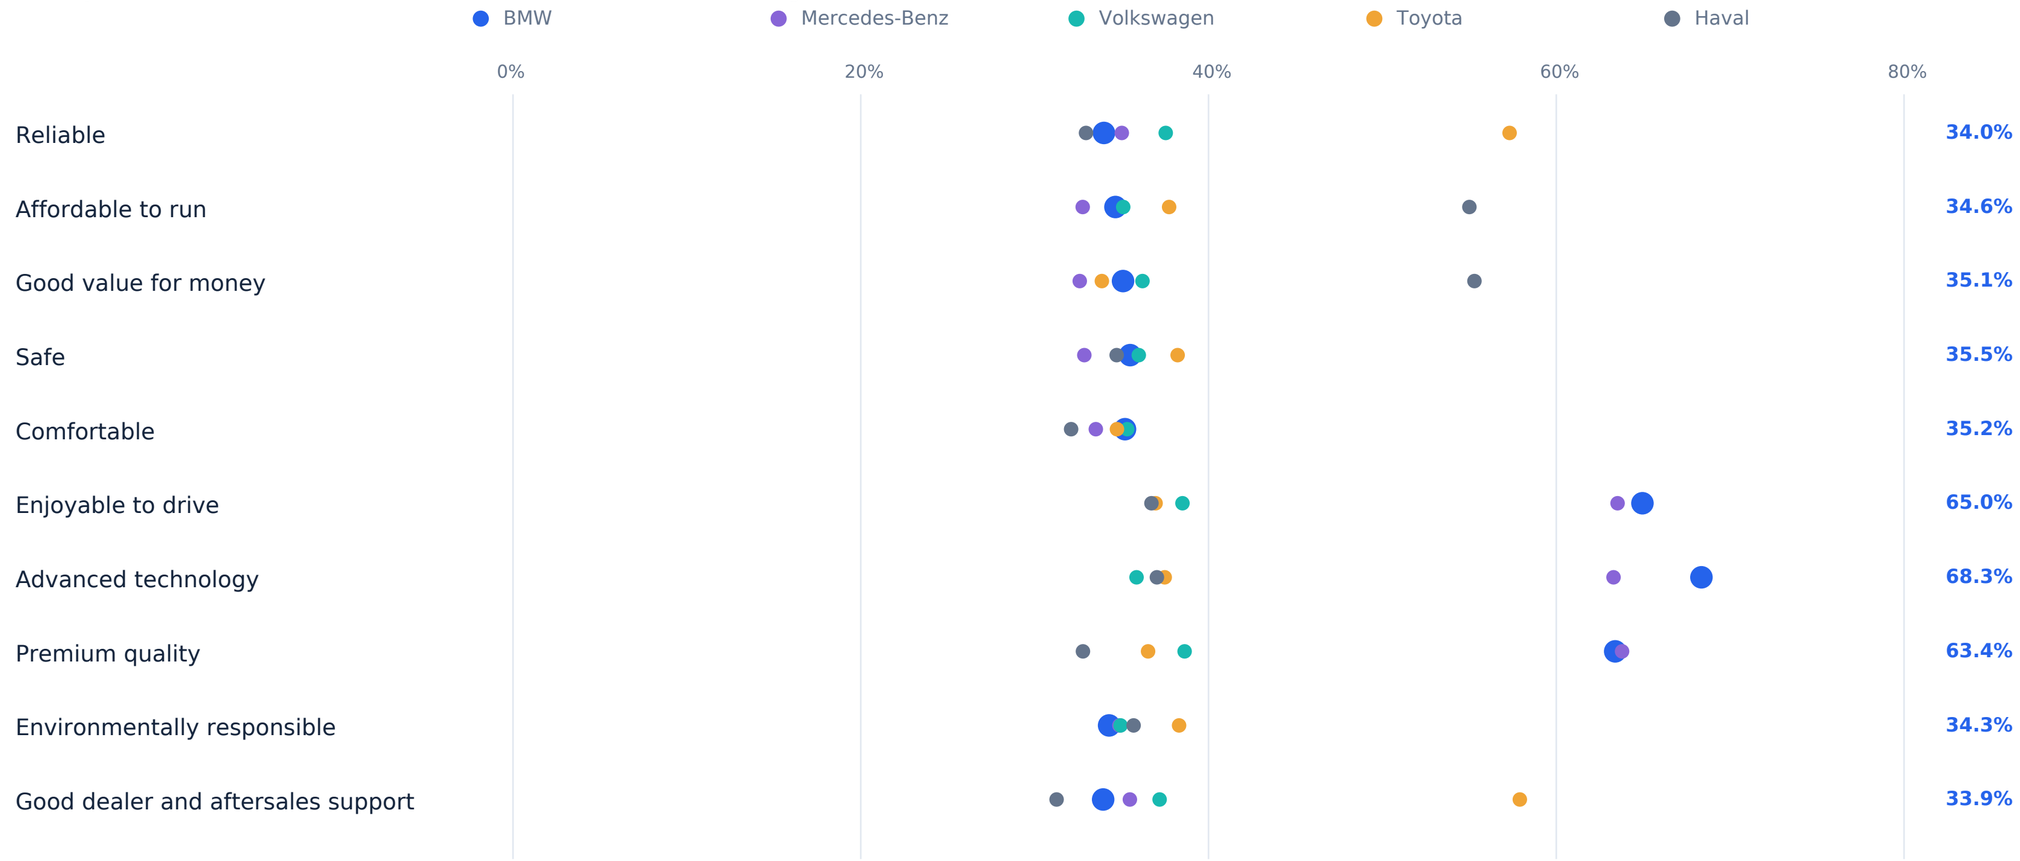

Brand associations

Compare what aware respondents associate with each brand.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Association profile

Pick-any associations. Each brand uses its own awareness base; these are not agreement scores.

Aware bases: BMW 876 | Mercedes-Benz 832 | Volkswagen 910 | Toyota 960 | Haval 712. Positioning model appears only when a supported analysis has completed.

Design preview

Static mockups for automatic dashboards. No live integration.

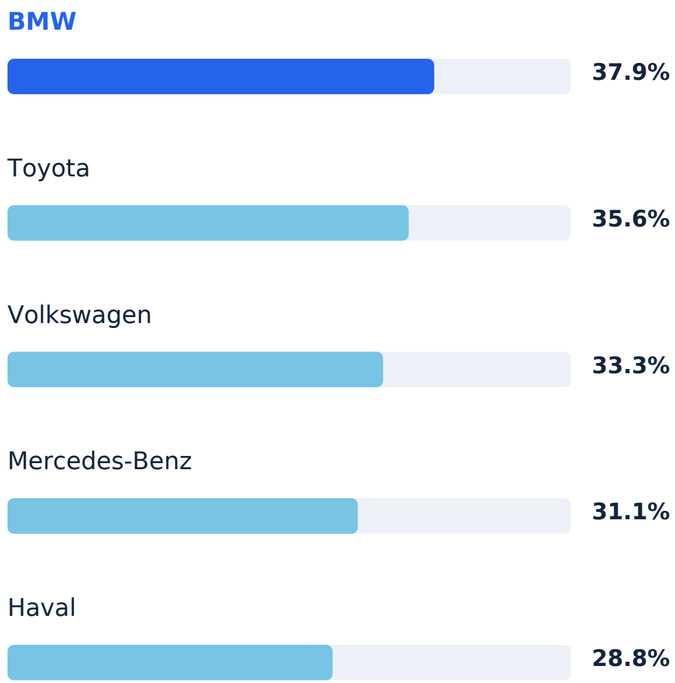

Advertising & word of mouth

Separate prompted advertising recall from what people have heard about brands.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Advertising recall

Prompted four-week recall; n=1,000. Scale: 0-50%.

Self-reported recall is not verified ad exposure or an estimate of media effectiveness.

Word of mouth

Six exclusive groups; all eligible respondents, n=1,000.

The reference screenshots use fewer groups. This layout preserves all six categories in the simulated questionnaire.

Design preview

Static mockups for automatic dashboards. No live integration.

Audience & media

Buyer profiles stay separate from awareness and intention measures.

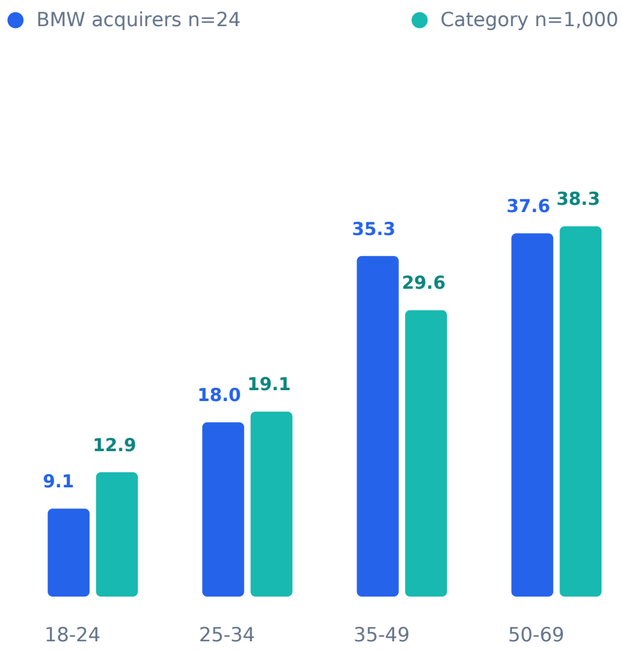

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

VERY SMALL BASE: BMW recent acquirers n=24

Descriptive illustration only. No significance, targeting or market inference.

Age profile

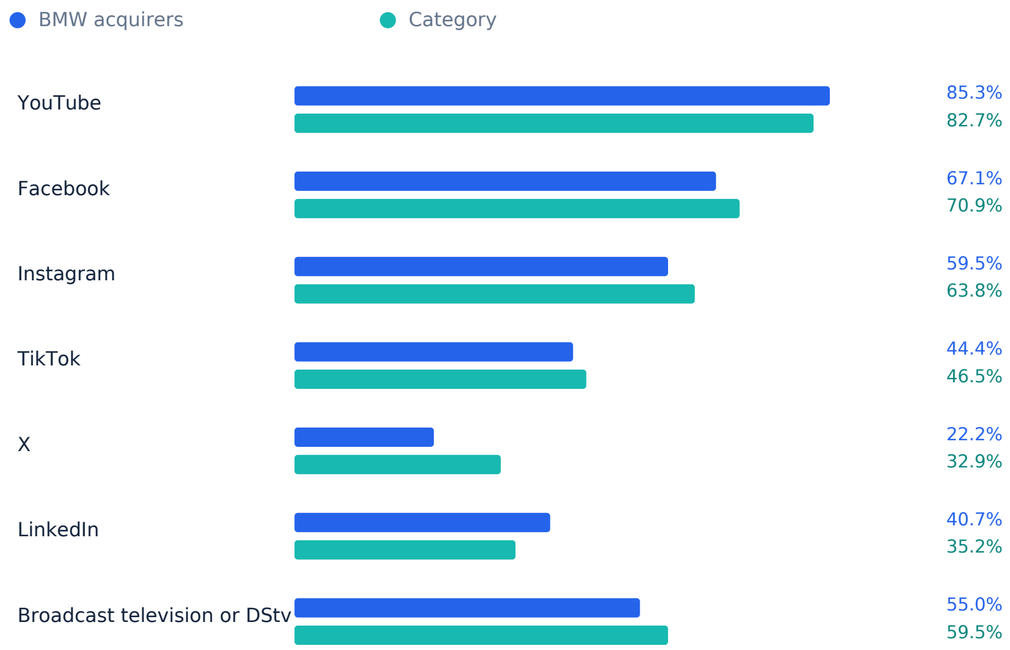

Past-12-month BMW acquirers vs all eligible category respondents.

Age percentages use valid ages. Other profile tabs can show gender, province, income and life stage with their own valid bases.

Media use in the past seven days

Multiple response; media habits, not advertising effectiveness.

All comparisons on this screen carry the same small-base warning. A production dashboard can suppress these cards by configured rule.

From data read to dashboard

A reusable visual template, populated by validated question and analysis mappings.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

01

Read the wave files

Detect wave, respondent ID, labels, weights and multiple-response sets.

02

Confirm the structure

Match brands, funnel stages, moments, attributes and eligible bases.

03

Create every view

Fill supported cards automatically. Keep unavailable cards clearly labelled.

04

Refresh on new waves

Recompute the same definitions and retain previous-wave comparability.

Question groups become dashboard panels

Rules are reusable across brands and compatible trackers.

Awareness + consideration + shortlist + first choice
Funnel / comparisons / trend

Relevant moments + cue-by-brand recall
Need ranking / moment heatmap

Brand-aware attribute selections
Association comparisons

Advertising recall + word-of-mouth categories
Recall ranking / WOM composition

Acquisition flag + demographics + media use
Buyer profile / media comparisons

Visible states

Never turn a missing result into zero.

Ready
Validated data and chart definition.

Mapping needed
Ask only for unresolved questions.

Calculating
Analysis output is not ready yet.

Not measured
Required question is absent.

Small base
Warn or suppress by configured rule.

Design preview

Static mockups for automatic dashboards. No live integration.

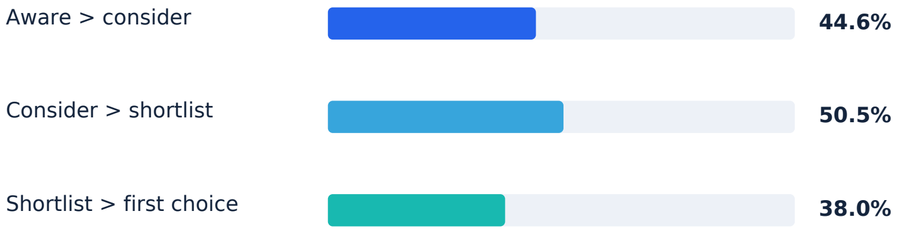

Complete the brand-tracker views

Additional panels supported by the source specification, with honest output states.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Conditional conversion

BMW, October 2026. Ratio of nested stages, not longitudinal conversion.

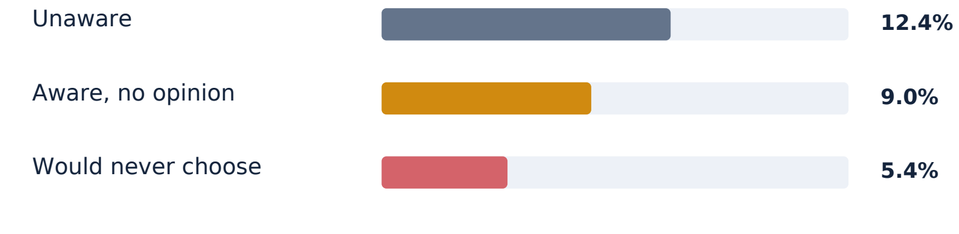

Preceding-stage bases: n=876 / 391 / 197. Acquisition and ownership remain separate measures.

Unfamiliar & rejectors

Three distinct groups preserve the questionnaire meaning.

BMW - all eligible n=1,000; groups do not sum to 100%.

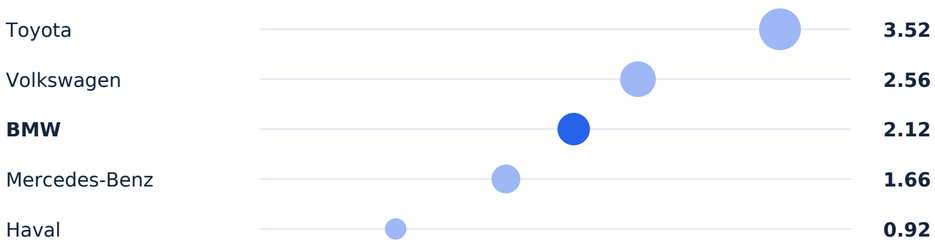

Bar scale: 0-20%. Distinct measures, not a stacked total.

Brand-moment strength

Separate reach from breadth; do not combine the denominators.

Average cue links per eligible respondent (n=1,000)

Position: average links, 0-4 scale. Bubble area: share of tracked-brand cue links. These are not sales-market shares.

Exploratory analysis panels

Additional model outputs only appear when validated.

Planned - model output needed

Brand fingerprint

Observed-minus-expected cue-link heatmap. Descriptive differences, not a significance test.

Exploratory positioning

Correspondence-analysis map for brands and attributes, with axis inertia and an interpretation note.

Category overview

The broader category context, kept separate from BMW buyer profiles.

Brand BMW | Wave Oct 2026 | Compare Selected brands | Weighting On | Segment All eligible

Brands recognised

8.4 Mean / respondent

Brands considered

3.8 Mean / respondent

Brands acquired in past 12 months

0.2 Mean / respondent

Repertoire: ten tracked brands; Other excluded. All eligible n=1,000.

How decisions are made

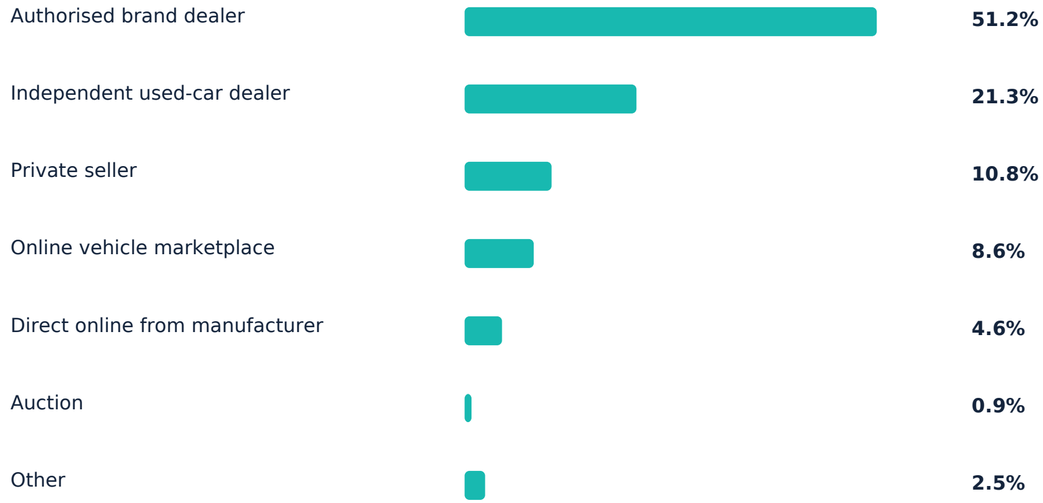

All eligible valid respondents, n=1,000. Single response.

Category context is not a BMW-specific customer result. Bars use a 0-100% scale.

Most recent acquisition channel

Past-12-month household acquirers, n=223. Single response.

Bar scale: 0-60%. This is not the multiple-response research journey and not a population market share.
