SELECTED INDICATOR

Iron during antenatal care

DHS / World Bank Data360

DEFINITION

Women with a live birth (or stillbirth) in the two years preceding the survey.

VISIBLE PANELS

Source: DHS via World Bank Data360 • RH_ANCC_W_IRN • no interpolation

What this view says

Descriptive summary, not a causal explanation

Reported coverage rose from 70.5% in 2014 to 90.2% in 2022.

This is an 8-year gap between observations. No annual path or statistical significance is inferred.

Definition & provenance

Women with a live birth (or stillbirth) in the two years preceding the survey.

Female • all ages / no age breakdown • urbanisation not applicable • unit multiplier 0 • one decimal

Observation: Normal / Public • survey: DHS 2022 • source metadata date: 10 Oct 2026 (not observation vintage)

Indicators dashboard

A single reporting workspace across providers. Source is a filter, not a separate app.

Auto-generated | Observed data only

DHS sample • source mapping retained

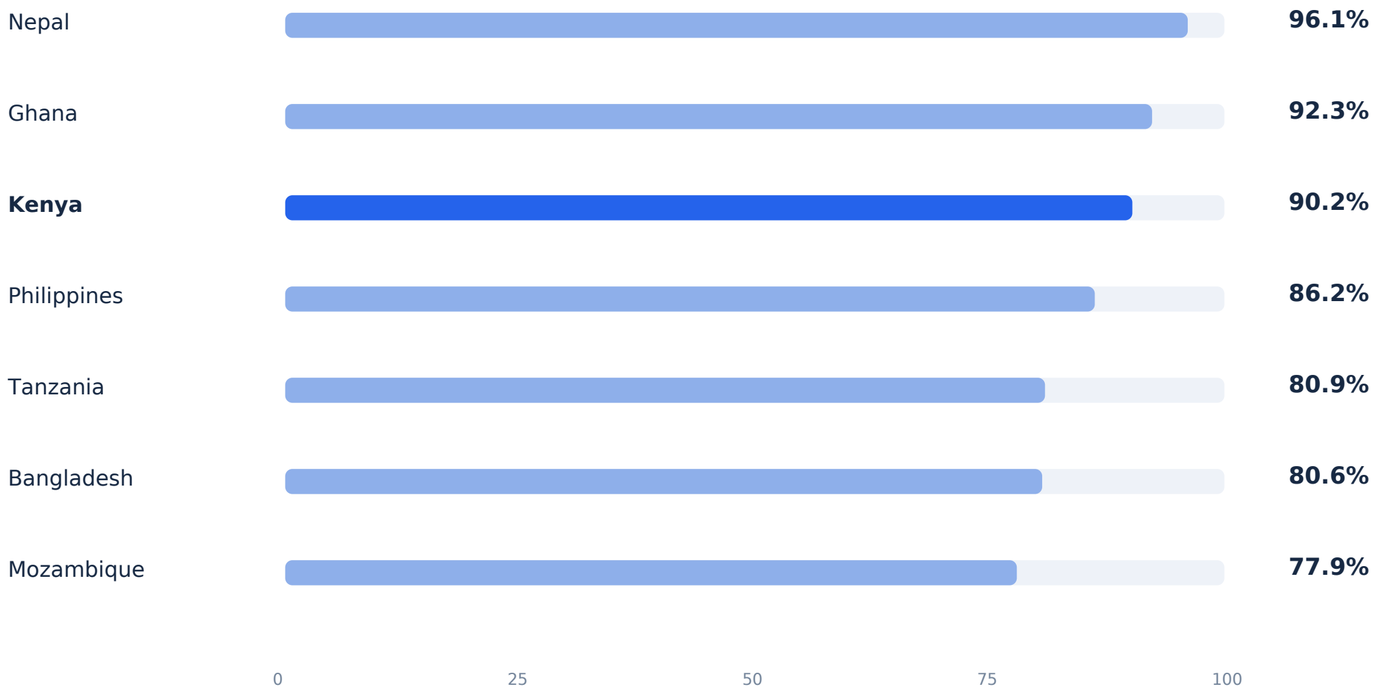

Overview | Trends | **Compare** | Data & sources

Selected countries | Iron in antenatal care | Reference year 2022 | Two-year window | All loaded sources

Matched comparison Reference year 2022 | Same indicator, subgroup and two-year window | Not a global league table

Country comparison

% of women in same subgroup • source reference year 2022 • selected available countries

Source: DHS / World Bank Data360 • Mozambique survey label: DHS 2022–23

Comparison rules

Visible safeguards, not hidden assumptions

Common year only

Do not replace missing 2022 with a nearby year.

Definition locked

Two-year window; no mixing 3- or 5-year groups.

Survey context retained

Reference year and fieldwork label both shown.

Selected observation

Kenya • 2022

90.2%

DHS, 2022

Normal value / Public

No sample size or uncertainty interval supplied in this file.

Open underlying row / source details

Indicators dashboard

Observed histories in one workspace. Add more indicators only when observation data is available.

Auto-generated | Observed data only

DHS sample • source mapping retained

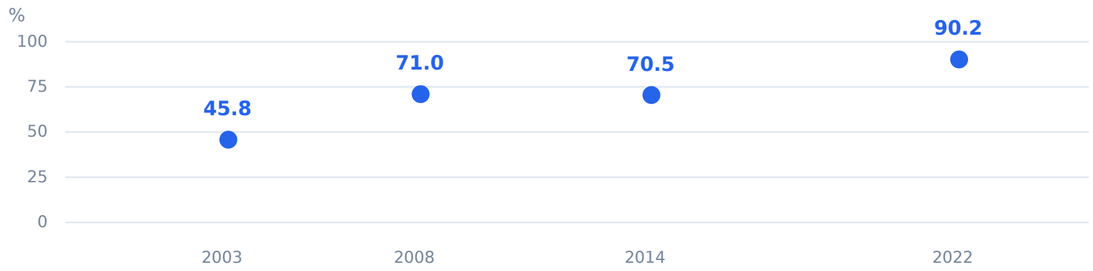

Overview | **Trends** | Compare | Data & sources

Selected countries | Iron in antenatal care | 1999–2025 | Two-year window | All loaded sources

Small multiples This sample: one indicator across countries. Future mixed indicators retain separate units and axes.

Kenya

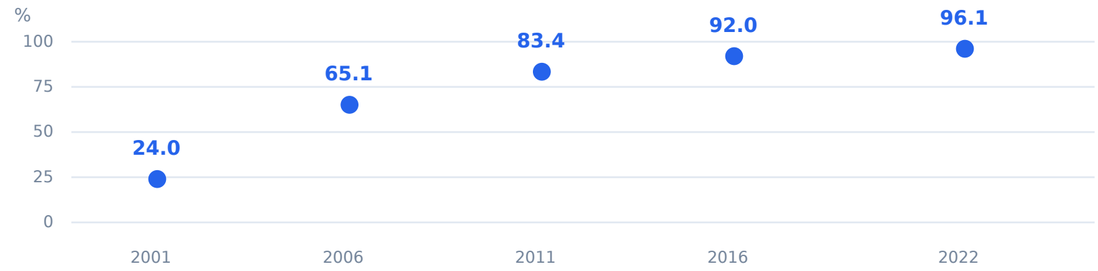

Iron during antenatal care • % • same two-year reference window

DHS / World Bank Data360 • points show actual observed years only

Nepal

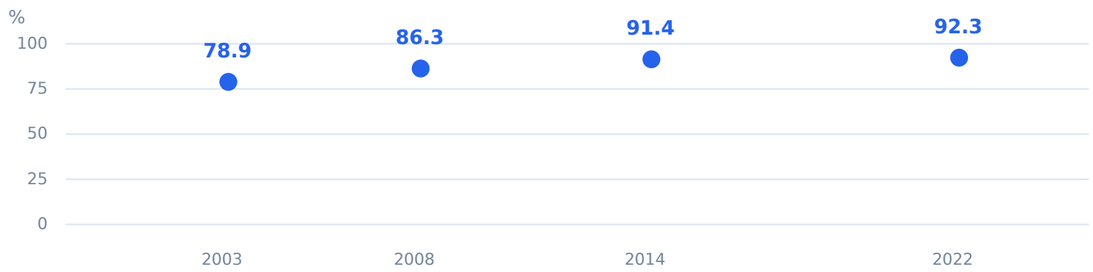

Iron during antenatal care • % • same two-year reference window

DHS / World Bank Data360 • points show actual observed years only

Ghana

Iron during antenatal care • % • same two-year reference window

DHS / World Bank Data360 • points show actual observed years only

Bangladesh

Iron during antenatal care • % • same two-year reference window

DHS / World Bank Data360 • points show actual observed years only

Indicators dashboard

Import once. Read the schema, validate observations, then suggest the appropriate dashboard.

Auto-generated Observed data only

DHS sample • source mapping retained

Overview Trends Compare **Data & sources**

All imported areas | All imported indicators | All imported periods | All reference windows | All loaded sources

Source readiness

Providers coexist in one workspace; readiness belongs to each imported dataset.

Imported dataset	Available content	Dashboard status	Next step
World Bank Data360 / DHS	607 observations • 1 indicator	Ready: charts populated	Explore or refine selection
OECD / FDI income aggregates	79 metadata rows • no values	Metadata only: no charts	Upload observation data
IMF	No file provided	Not loaded	Upload a sample file

Automatic generation flow

A usable shell appears immediately; valid series populate without chart-by-chart setup.

1 Read file and detect shape

Wide years → long observations; metadata ≠ measures.

2 Resolve codes and dimensions

Show matched fields; ask only for unresolved mappings.

3 Validate and select safe defaults

Compatible units, subgroup, time and country keys.

4 Render and preserve user choices

Headline, trend, comparison, source details; optional edits.

Coverage & trust

Supplied DHS file • not provider-wide coverage

71 reference areas

213 distinct series

1999–2025 observed year span

No release vintage is supplied. Keep metadata date separate from survey year and file-import time.
